ABOUT US

About *VP Global Exim*

An India-based merchant export company, headquartered in Gondal, Rajkot (Gujarat), connecting international buyers with trusted Indian manufacturers.

We export industrial minerals, spices, engineering components, ceramic tiles, building materials, sanitary ware and apparel. Alongside standard products, we develop customised engineering solutions from customer drawings, specifications and samples.

We are a merchant exporter, not a broker: we buy the goods, inspect them and sell them under our own name. We are also a brand owner: **VRA**, our range of chrome-plated bath fittings, gives buyers factory-direct pricing and private-label flexibility.

Our objective is not only to export products but to become a long-term sourcing partner, built on integrity, transparency and customer satisfaction.

A trusted bridge to Indian manufacturing

OUR VISION

To become a globally recognised and trusted merchant export company, delivering quality products, innovative sourcing solutions and exceptional service through long-term partnerships.

OUR MISSION

To provide reliable, cost-effective, high-quality export solutions by partnering with leading Indian manufacturers and delivering products that exceed expectations.

OUR FOUNDING PRINCIPLES

Truth · Love · Compassion

The three words beneath our logo are how we do business.

Truth

"Our word is our specification."

What we quote, test and document is exactly what you receive. If a grade, price or date is not realistic, we tell you before you commit.

Love

"We care for every order as our own."

From the factory floor to the packing line, we treat your goods as our own, and build partnerships that last for years, not one shipment.

Compassion

"Your problem becomes our problem."

We understand the deadlines, budgets and markets you answer to. When something goes wrong, we carry it and solve it with you, never pass it on.

> *International business is built on trust, quality, timely delivery and professional service. Whether you need standard products or tailor-made solutions, we work closely with our manufacturing partners so every order meets your expectations. Together, let's build a stronger global business.*

HOW WE WORK

Who carries *the risk?*

In export trade, the real test comes when something goes wrong. A sourcing agent introduces you to a factory and steps away. A merchant exporter buys the goods and sells them to you, so the responsibility stays with us.

	A SOURCING AGENT	VP GLOBAL EXIM
WHO SELLS TO YOU	A mill you have never visited	VP Global Exim, under our own name
HOW THEY EARN	Commission on the introduction, paid either way	Margin on goods we bought; we lose if the lot fails
WHO TESTS THE LOT	You do, at destination, after it has sailed	We do, before shipment, with lab and inspection reports
IF A LOT FAILS	Your problem: claim against an unknown supplier	We carry the rejected lot and replace it
ACROSS PRODUCTS	Separate supplier and shipment for each	Mixed products in one container, one invoice

FOUR THINGS WE DO ON EVERY ORDER

01
SOURCE

Select and vet the right manufacturer for your specification, volume and budget.

02
INSPECT

In-line and pre-shipment checks, lab tests and photos before the container is closed.

03
CONSOLIDATE

Combine different products into one container, on one document set.

04
SHIP

Export packing, documents and freight coordination to your port or door.

01

RANGE 01 · VP-MIN

Industrial *Minerals*

Sand and chalk powder from established Indian producers, graded to the mesh and chemistry you specify, and packed for export in bags, jumbo bags or bulk.

Natural materials, stronger tomorrows.

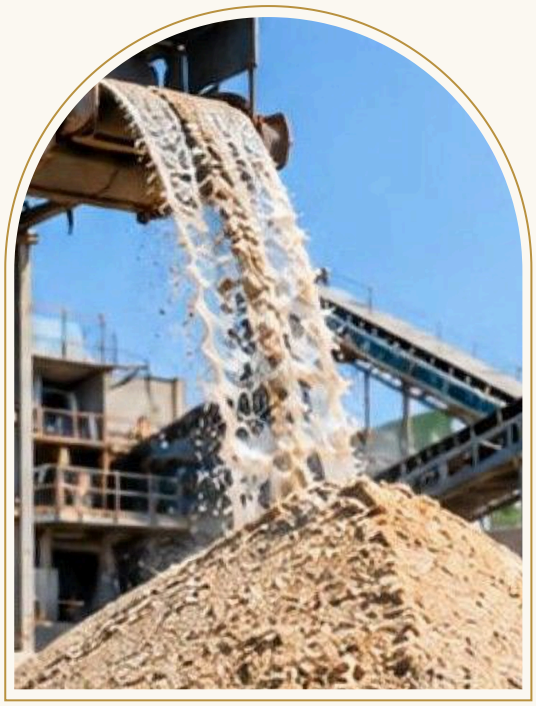

PLATE 01 — IN THE RANGE

01
Construction sand
Concrete, mortar, plaster, blocks

02
Silica sand
Glass, ceramics, filtration

03
Washed sand
Low fines and clay, cleaner mixes

04
Foundry sand
AFS grain size and clay controlled

05
Natural chalk powder
Paints, putty, fillers, paper

06
Micronized & coated chalk
Plastics, PVC, rubber, coatings

HS Codes	Packing	Testing	Shipment
2505 10 11 · 2505 10 19 · 2509 00 00	25 / 50 kg bags, jumbo bags, bulk	Lab report per lot on request	Containerised from Gujarat ports

VP-MIN · SAND RANGE

Sand for every *application*

Carefully selected sand and mineral materials for construction, industrial, landscaping, foundry and specialised applications, matched to the grade your project specifies.

Natural materials, stronger tomorrows.

THE SAND RANGE

01 Construction sand
Mortar, masonry, plastering, concrete-related work and general building. Grading discussed to requirement; bulk supply available.

02 Silica sand
Silica-rich sand for glass, foundry, ceramics and filtration. SiO_2, Fe_2O_3, particle size, colour and moisture to specification.

03 Washed sand
Processed to reduce fines, clay and silt for a cleaner, more consistent material in construction, paving and landscaping.

04 River sand
Naturally sourced sand for plastering and construction, supplied subject to source characteristics, regulations and destination rules.

05 M-Sand (manufactured sand)
Rock processed to controlled particle sizes for concrete, masonry, paving and infrastructure: a consistent, sustainable alternative.

06 Foundry sand
Grades for moulding and core-making where grain size, AFS fineness, clay content, permeability and thermal stability matter.

07 Industrial & specialty sand
High-purity, custom-graded and decorative colour sands for glass, filtration, coatings, abrasives and specialised manufacturing.

08 Custom grades
Share your particle-size range, chemistry targets, moisture, fines and packing needs; we review and match the closest available grade.

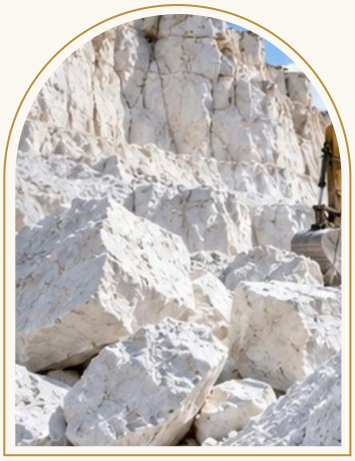

TYPICAL APPLICATIONS

Construction · Glass & ceramics · Foundry · Filtration · Landscaping · Industrial processing · Coatings & abrasives · Paving

Final suitability depends on the buyer's application, local standards and the agreed product specification. Availability, sourcing and documentation are confirmed for each order.

VP-MIN · CHALK POWDER RANGE

Chalk powder, *pure and consistent*

High-quality chalk powder (calcium carbonate) for industrial, manufacturing, agricultural, construction and specialty applications, export-ready in bags or jumbo bags.

From nature to a stronger tomorrow.

THE CHALK POWDER RANGE

01 Natural chalk powder
Processed from natural chalk deposits into a fine, white to off-white powder for paints, putty, fillers, rubber, plastics and adhesives.

02 Industrial-grade chalk powder
For processes needing consistent particle size, whiteness and purity: paints and coatings, plastics, rubber, sealants and construction compounds.

03 Micronized chalk powder
Controlled fine particle size for smooth dispersion and surface finish in paints, plastics, rubber, adhesives and construction chemicals.

04 Coated chalk powder
Surface-treated for compatibility in PVC and plastic products, rubber compounds, masterbatch, wires and cables, profiles and sheets.

05 Calcium carbonate / chalk-based powder
A mineral filler or functional extender for paints, plastics, rubber, paper-related, construction, adhesive and putty products.

06 Filler-grade chalk powder
Fine, standard and custom particle-size grades where controlled mineral loading and whiteness are required: wall putty, paints and compounds.

07 Agricultural chalk
Calcium carbonate for soil amendment, pH management and horticulture, subject to local regulations and the intended use.

08 Construction & custom grades
Filler or extender for wall putty, joint compounds, sealants and cementitious products; custom grades to your formulation.

PARAMETERS WE CAN SPECIFY

- $CaCO_3$ content
- Particle-size distribution
- Whiteness
- Moisture
- Bulk density
- Oil absorption
- Residue / sieve retention
- Surface treatment

Product classification and specifications are confirmed against the intended end use. Agricultural suitability depends on local regulations; compliance documents are agreed before shipment.

VP-MIN · SPECIFICATION

Industrial Minerals *Specification*

Packed for the journey.

PRODUCT	HS CODE	GRADES & FORMS	TYPICAL USES
White silica sand	2505 10 11	Washed, graded by mesh / AFS; SiO_2 and Fe_2O_3 to spec	Glass, ceramics, foundry, water filtration
Red sand	2505 10 19	Natural or washed, graded by particle size	Construction, plaster, landscaping, sports surfaces
Construction / washed sand	2505	Graded, washed, low fines	Concrete, mortar, block making, plaster
Foundry sand	2505 10	AFS grain fineness, clay and moisture controlled	Moulds and cores for metal casting
Chalk powder	2509 00 00	Natural, industrial, micronized, coated, filler, agricultural	Paints, putty, PVC, rubber, paper, soil

PARAMETERS WE AGREE ON THE CONTRACT

- Particle-size distribution
- Mesh / AFS number
- SiO_2 content
- Fe_2O_3 / iron
- $CaCO_3$ content
- Whiteness
- Moisture
- Bulk density
- Clay content
- Oil absorption
- Colour

Agricultural chalk

25 / 50 kg bags

Jumbo bags, containerised

FEATURE	ADVANTAGE	BENEFIT
Grade agreed on paper: mesh, chemistry and moisture	Each lot checked against those numbers before loading	Material that runs on your line without re-screening

To quote, *send us*

- Product and grade
- Key chemistry (SiO_2, Fe_2O_3, $CaCO_3$)
- Packing type
- Mesh / particle size
- Quantity in MT
- Destination port

VP-MIN · QUALITY & EXPORT

Tested, documented *and export-ready*

For international mineral supply, consistency and documentation matter. Our approach is built on clear specifications and agreed inspection requirements.

Quality in every grain.

FROM SAMPLE TO SHIPMENT

01 — Inquiry
Product, quantity, destination, specification and packing.

02 — Review
Technical and commercial requirements; suitable material identified.

03 — Quotation
Pricing, packing, lead time and commercial terms.

04 — Sample
Samples and technical documents reviewed where required.

05 — Confirmation
Quantity, specification, packing, payment terms, Incoterms, schedule.

06 — Preparation
Material processed, packed and arranged for dispatch.

07 — Documentation
Export and commercial documents coordinated.

08 — Shipment
Dispatched as agreed, with communication until delivery.

DOCUMENTS AVAILABLE

Quality	Product specification sheet · Certificate of Analysis (where agreed) · Test reports
Shipping	Commercial invoice · Packing list · Certificate of Origin · Other export documents as required
Inspection	Independent third-party inspection can be arranged when required by the buyer or contract

PACKING & LOGISTICS

Packing	25 kg bags · 50 kg bags · Jumbo / FIBC bags · Bulk
Planning	Quantity, port of loading, destination port, container type, Incoterms and shipping schedule
Ports	Containerised shipments from Gujarat ports (Mundra / Kandla)

Silica sand

Foundry sand

Micronized & coated chalk

All product specifications, availability, packaging, certifications and shipping terms are subject to confirmation for each order.

EXPORT SERVICES

From the factory *to your port*

A single partner across the export journey: sourcing, consolidation, packing, documentation and shipping.

One container, one document set.

1 **Sourcing** — Right manufacturer for your spec

2 **Consolidation** — Mixed products in one load

3 **Export packing** — Built for sea freight

4 **Documentation** — Prepared end to end

5 **Shipping** — Port-to-port or door-to-door

How each range is packed

Bulk & bags
Minerals and spices: 25 / 50 kg PP, jute or paper bags; jumbo FIBC bags; bulk.

Cartons & pallets
Tiles and sanitary ware: export cartons, pallets, A-frames for slabs.

Crates
Engineering parts: VCI-wrapped, cell-partitioned, ISPM 15 heat-treated wooden crates.

Retail-ready
Apparel, spices, VRA: your branded packs, labels, barcodes and pre-packs.

Delivery terms (Incoterms 2020), in plain words

EXW — Ex Works
You collect from the factory; you handle export clearance and freight.

FOB — Free on Board
We deliver, clear and load at the Indian port; you book the ocean freight.

CFR / CIF — Cost & Freight + Insurance
We pay ocean freight to your port (and insurance under CIF). Most common for new buyers.

DAP — Delivered at Place
We deliver to your named place; you clear import and pay duties.

Ports: shipments normally leave from Mundra or Kandla in Gujarat, close to our Rajkot base. Other Indian ports, LCL (part-container) and air freight are available on request.

HOW TO ORDER

From your inquiry *to your port*

Buying from India for the first time? This is exactly how an order with VP Global Exim works. One team handles it from start to finish, and you always know who to call.

1 Send your inquiry
Email, WhatsApp or website form: product, specification or drawing, quantity, destination.

2 We review the requirement
We check the grade, tolerance and your market's import rules, and ask about anything unclear.

3 Receive our quotation
Within 24 hours: price, MOQ, lead time, packing, Incoterm and payment terms.

4 Approve a sample
Sample, first-article report or lab report sent for approval where needed.

5 Confirm the order
Your purchase order and our proforma invoice; payment terms agreed before production.

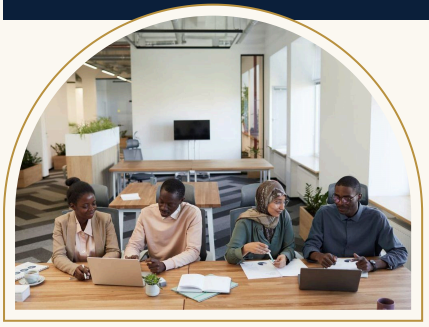

6 Production & inspection
We follow production, inspect in-line and before shipment, and share photos and reports.

7 Packing & loading
Packed to the agreed method; loading supervised and photographed.

8 Documents & delivery
Shipping documents sent to you; we track the vessel until it reaches your port.

CHECKLIST: WHAT TO SEND FOR A FAST, ACCURATE QUOTE

- Product name, grade or drawing
- Quantity and unit (MT, pcs, m²)
- Packing and labelling needs
- Destination port and country
- Preferred delivery term (FOB, CIF...)
- Required delivery date
- Certificates your market requires
- Target price, if you have one
- Your company name and contact

Inquiry and quotation

Production and inspection

Shipment to your port

TRUTH · LOVE · COMPASSION

Our word is our specification.

CONTACT US

Let's build *together*

Send us a product, a grade or a drawing, a quantity and a destination port. You will have pricing, MOQ and lead time specific to your market within 24 hours.
